DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group II in Paper No. 17 is acknowledged.

Claims 19,20 & 29 are withdrawn from further consideration pursuant to 37 CFR

1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No.17.

This application contains claims 19,20 & 29 are drawn to an invention nonelected with traverse in Paper No. 17. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 21-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- A) Claims 21-28 are indefinite because the claim 21 recites a first probe that differ between the sets but also recites that the first probe is common to all the pools. It is unclear as to whether the first probe is different or the same.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 21-28 & 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Satoshi et al (WO98/11210 March 3, 1998) in view of Chetverin et al (US6,103,463 Aug. 15, 2000).

Satoshi et al teach an array with first probe which binds to different mismatch at an interrogation site and second probe which is common to the target sequence and nonoverlapping to the complementary region of the first probe (see whole doc. esp abstract and cover figure).

Satoshi et al do not explicitly teach a plurality of different sets in different regions.

Art Unit: 1637

Chetverin et al teach the an array with different regions with different probes (see whole doc. esp.col.3 lines 47-col. 4 line 5). They teach use of binary arrays with two immobilized sequences one constant and other variable and ligation.

One of ordinary skill in the art at the time the invention was made would have been motivated to apply chetverin et al's teachings of array of multiple regions to Satoshi et al's ligation assay in order to detect mutations in a plurality of different targets. As it was well known and commonly practiced in the art to construct high density multiple probe arrays as shown by Chetverin, it would have been prima facie obvious to apply Chetverin et al's teachings of multiple probe arrays to Satoshi et al's ligation assay in order to simultaneously detect different mutations in different target sequences.

SUMMARY

4. No claims allowed.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 1637

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
